

PFC Coils

For ON Semiconductor NCP1653
Power Factor Controller

These coils were developed specifically for use with the ON Semiconductor NCP1653 Power Factor Controller (PFC) for driving continuous conduction mode step-up pre-converters.

The C1061-A operates in 150 Watt applications. The C1062-B operates in 300 Watt applications and is specified by ON Semiconductor in application note AND8185/D.

In addition to the standard parts shown, Coilcraft can design custom magnetics with inductance, DCR and current values to meet your specific requirements. For more information, contact Coilcraft.

To request free evaluation samples of these coils, contact Coilcraft or visit www.coilcraft.com.

Part number	Application	Inductance ¹ ±10% (µH)	Inductance at I _{pk} min (µH)	I _{pk} (A)	DCR max ² (Ohms)	SRF (MHz)	I _{rms} ³ (A)
C1061-AL	150 W	450	405	4.5	0.166	1.4	3.80
C1062-BL	300 W	570	540	6.0	0.226	1.0	3.55

1. Inductance measured at 100 kHz, 0.1 V, 0 Adc using an Agilent/HP 4284A impedance analyzer.
2. DCR measured on Cambridge Technology micro-ohmmeter and Coilcraft CCF858 test fixture.
3. Current that causes a 40°C rise from 25°C ambient.

4. Ambient temperature range: -40°C to +85°C
Storage temperature range: Component: -40°C to +125°C
Tape and reel packaging: -40°C to +80°C
5. Electrical specifications at 25°C.
